EER Diagram

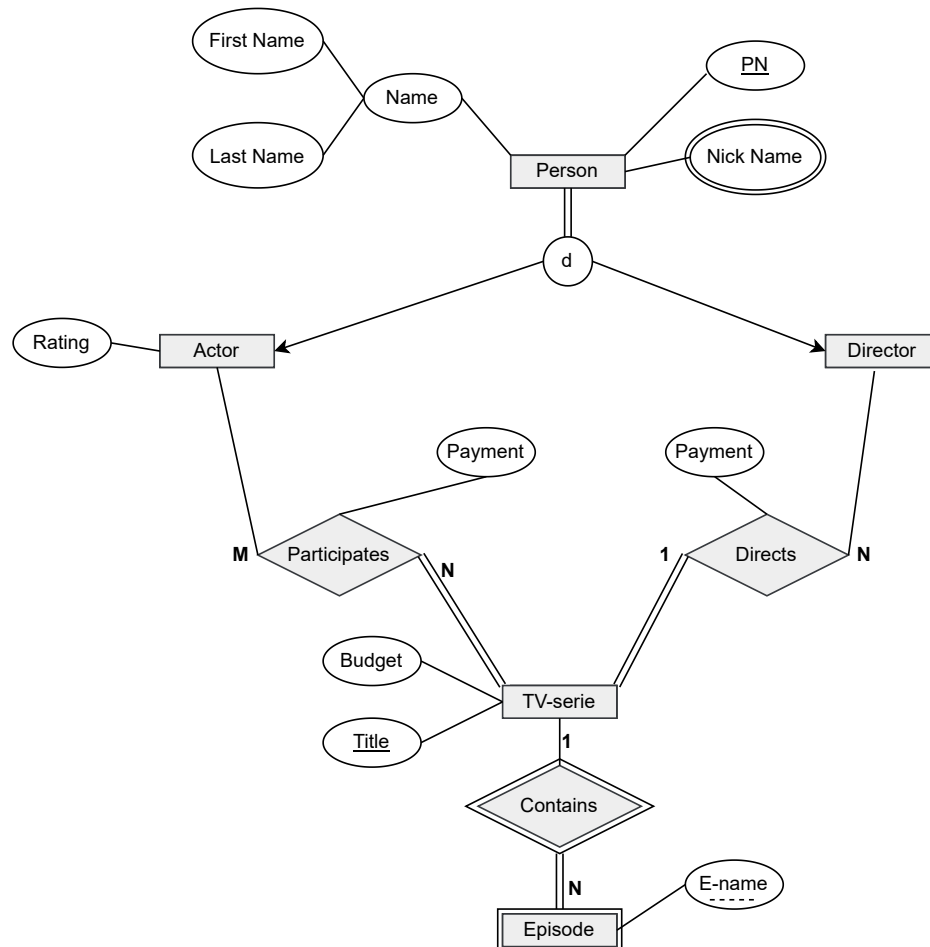

Figure 1: EER diagram that describes the relation between entities in Task 1.

Additional Assumptions

There are some additional assumptions that are made during the design process of EER diagram in Figure 1. It is assumed that:

- all persons involved in making the TV-series are either director or actor.
- a TV-series cannot exist without actors and directors, hence the total participation in "Participates" and "Directs" relations between TV-series, actors and directors.
- multiple actors can play a role in one TV series at the same time and vice versa.
- multiple directors can work on the same TV-series simultaneously, but on different episodes.
- each episode is directed by only one director.
